

AMENDMENTS TO THE CLAIMS:

This listing of the claims will replace all prior versions, and listings, of the claims in this application.

Listing of Claims:

1. (Previously Presented) A method to organize a trip, comprising:

at a travel service site, establishing a homepage for a trip;

sending an electronic notification to potential trip participants from the travel service site for informing them of the existence of the trip homepage; and

making at least travel arrangements related to the trip by using tools provided to the potential trip participants at the trip homepage, where one of said tools enables trip participants to vote on at least one of trip destination and trip dates.

2. Cancelled.

3. (Previously Presented) A method as in claim 1, where sending an electronic notification includes sending a link to the homepage.

4. (Original) A method as in claim 1, where the travel arrangements comprise arranging payment for the trip.

5. (Original) A method as in claim 1, where the travel arrangements comprise arranging accommodations during the trip.

6. (Original) A method as in claim 1, where the travel arrangements comprise determining which trip participants will share lodging accommodations during the trip.

7. (Previously Presented) A method to provide a group travel service over the Internet, comprising:

at a travel service site, establishing a homepage for a group trip by a group trip leader, the group trip leader identifying at least email addresses of potential group trip participants,

automatically contacting the potential group trip participants from the travel service site for providing them with a link to the group trip homepage; and

making travel arrangements related to the group trip by using tools provided to the potential trip participants at the group trip homepage, where one of said tools enables trip participants to vote on at least one of trip destination and trip dates.

8. Cancelled.

9. (Original) A method as in claim 7, where the travel arrangements comprise arranging payment for the trip.

10. (Original) A method as in claim 7, where the travel arrangements comprise arranging accommodations during the trip.

11. (Original) A method as in claim 7, where the travel arrangements comprise determining which trip participants will share lodging accommodations during the trip.

12. (Original) A method as in claim 7, further comprising enabling a member of the public to learn of the existence of the group trip, and join the group trip as a group trip participant.

13. (Previously Presented) A method as in claim 7, further comprising establishing a travel log album for the trip, and giving group trip participants access to the travel log album.

14. (Previously Presented) A method as in claim 7, further comprising establishing a travel log album for the trip, and giving both group trip participants and members of the public access to the travel log album.

15. (Original) A method as in claim 14, where at least group trip participants are enabled to upload photographs to the travel log album, and where group trip participants and members of the public are enabled to download photographs from the travel log album.

16. (Currently Amended) A system operable to provide a group travel service over the Internet, comprising an interface to the Internet and a server executing software for implementing the group travel service, said server being bidirectionally coupled to the Internet via said interface and configured to respond to a group trip leader identifying contact information for potential group trip participants to automatically contact the potential group trip participants for providing them with a link to a group trip homepage, said server being further configured to respond to potential group trip participants accessing the group trip homepage to make travel arrangements related to the group trip by using tools provided to the potential trip participants at the group trip homepage, said travel arrangements comprising at least one of arranging payment for the trip and arranging accommodations during the trip, where one of said tools enables trip participants to vote on at least one of trip destination and trip dates.

17. (Original) A system as in claim 16, where said travel arrangements further comprise determining which trip participants will share lodging accommodations during the trip.

18. Cancelled.

19. (Original) A system as in claim 16, said server further establishing a travel service homepage for enabling a member of the public to learn of the existence of the group trip, and to join the

group trip as a group trip participant using at least the group trip homepage.

20. (Previously Presented) A system as in claim 16, further comprising establishing a travel log album for the trip, and providing both group trip participants and members of the public access to the travel log album, where at least group trip participants are enabled to upload photographs to the travel log album, and where group trip participants and members of the public are enabled to download photographs from the travel log album.

21. (Previously Presented) A system as in claim 16, where said tool that enables trip participants to vote allows group trip participants to vote on whether to allow a proposed group trip participant to join the group.

22. (Previously Presented) A system as in claim 16, where the group trip leader determines at least one of a duration of a particular voting-related ballot, a subject of a voting-related ballot, and whether a simple majority is sufficient to win a ballot, and where a vote cast by a group trip participant is selectively one of kept secret or made public.

23. (Previously Presented) A system as in claim 16, further comprising a tool enabling group trip participants to post messages to a group message board.

24. (Previously Presented) A system as in claim 16, further comprising a tool enabling tracking of group trip participants with respect to at least one or more of participation response, payment status, flight itinerary and number, seat assignment, hotel accommodation and room assignment.

25. (Previously Presented) A system as in claim 16, further comprising a tool enabling tracking of a group trip participant's personal itinerary, where access to the group trip participant's personal itinerary is granted only to that group trip participant.

26. (Previously Presented) A system as in claim 16, further comprising a tool enabling a group trip participant to establish a public profile that is viewable by other group trip participants.

27. (Previously Presented) A system as in claim 16, further comprising a tool enabling at least the group trip leader to post at least one of documents and hyperlinks related to the trip.

28. (Previously Presented) A system as in claim 16, further comprising a tool enabling group trip participants to determine those group trip participants that will share a hotel room, said room sharing tool creating lists organized by room and enabling group trip participants to select at least one roommate by entering their name in one of the lists.

29. (Previously Presented) A system as in claim 16, further comprising a tool enabling a group trip participant to invite another group trip participant to share a hotel room, where the invited group trip participant is enabled to accept or reject the invitation.

30. (Currently Amended) A system operable to provide a group travel service over the Internet, comprising an interface to the Internet and a server executing software for implementing the group travel service, said server being bidirectionally coupled to the Internet via said interface and configured to contact potential group trip participants to provide a link to a group trip homepage, said server being further configured to provide at least one tool at the group trip homepage to respond to potential group trip participants accessing the group trip homepage to become group trip participants, further comprising a tool configured to at least track responses of individual group trip participants including mode of travel related information and hotel accommodation related information enabling a plurality of group trip participants to coordinate the booking of flights, seating and hotel rooms, and further comprising a tool configured to enable trip participants to electronically vote on at least one of trip destination and trip dates.

31. (Previously Presented) A system as in claim 30, where said tool configured to enable trip participants to electronically vote is further configured to enable the trip participants to electronically vote on a choice of hotel.

32. (Previously Presented) A system as in claim 30, where said group trip homepage is initially established by a group trip leader using at least one other tool provided by said server for

S.N.: 10/759,331
Art Unit: 3628

customizing a homepage provided by the server, and where the group trip leader provides electronic mail contact information for the potential group trip participants to enable them to be contacted.

33. (Previously Presented) A system as in claim 30, where another tool enables a group trip participant to establish a public profile that is viewable by other group trip participants.
